Specialist P-1	Specialist P-2	Specialist P-3	Specialist P-4	Specialist P-5

[Table of Contents \(PDF file\)](#) / [Author Index \(PDF file\)](#)

Session O1 (oral)

PaperID	Author	PosterTitle
O1.01	A.Ekedahl	Demonstration of ITER relevant LHCD operation Large distance coupling in JET and long pulse operation in Tore Supra
O1.02	S.Günter	Conditions for NBI current profile control on ASDEX Upgrade
O1.03	B.A.Nelson	Solenoid free plasma production in NSTX by coaxial helicity injection
O1.04	A.E.Hubbard	Dependence of the C-Mod L-H Threshold on Magnetic Configuration and Relation to Scrape-off-layer Flows
O1.05	J.G.Cordey	The Scaling of the Energy Confinement in JET ELMY H-Modes with the Dimensionless Physics Parameters
O1.06	V.G.Kiptily	Gamma-Ray Measurements of Fusion Alpha Particles in JET Trace Tritium Experiments
O1.07	J.D.Martin	Dust grain temperature in a tokamak plasma
O1.09	L.Boufendi	Electrical Characterization of Dust Forming Plasma in Different Chemistries
O1.10	K.DeBleecker	Modelling of formation and transport of nanoparticles in silane discharges
O1.12	I.H.Hutchinson	Spin Stability of Asymmetrically Charged Plasma Dust
O1.15	L.S.Mkhitaryan	Influence of Perturbations of Fuel Inner Surface of Cryogenic Target on its Burning
O1.17	S.A.Dan'ko	Recent ICF Experiments on S-300 Pulsed Power Machine
O1.20	P.-H.Maire	Hydrodynamic instabilities in cylindrical geometry. Self-similar models and numerical simulations
O1.27	D.F.Gordon	Detailed Modeling of Channel Guided Laser Wakefield Accelerators Based on Capillary Discharges
O1.29	Z.-M.Sheng	Acceleration of electrons in the relativistic regime through multi-wave interactions
O1.30	K.Nakajima	Recent Results of Laser-Plasma Electron Beam Acceleration Experiments at JAERI-APRC
O1.31	K.V.Lotov	Efficient regime of the plasma wakefield accelerator

Session O2 (oral)

PaperID	Author	PosterTitle
O2.01	J.A.Boedo	ELM-Induced Plasma Transport in the DIII-D SOL
O2.02	P.R.Thomas	Suppression of large edge localized modes with a stochastic magnetic boundary in high confinement DIII-D plasmas

O2.03	A.Dinklage	Integrated Interpretative Transport Modelling
O2.04	A.Fujisawa	Experimental Identification of Zonal Flows in CHS
O2.05	T.P.Goodman	Inductive Current Perturbations to Steady-State eITBs
O2.06	V.Vershkov	STUDIES OF TOKAMAK CORE SMALL-SCALE TURBULENCE IN DIFFERENT REGIMES OF T-10, TEXTOR AND FTU TOKAMAKS
O2.07	B.Ph.vanMilligen	Probabilistic transport models for fusion
O2.08	G.Y.Antar	On the Origin of 'Intermittency' in the Scrape-off Layer of Linear Magnetic Confinement Devices
O2.09	J.R.Myra	Plasma Convection by Blobs in the Scrape-off-Layer
O2.10	M.M.Skoric	Ultra- Intense EM Solitons in a Relativistic Laser-Plasma Interaction
O2.13	M.Mikikian	Instabilities in a Dense Cloud of Grown Dust Particles
O2.14	E.Kovacevic	Plasma polymerized nanoparticles as astro-analogues
O2.16	M.Coppins	The critical droplet size in a misty plasma
O2.18	V.Land	Transport of dust with magnetic field and UV-radiation
O2.20	M.G.Haines	Ion viscous heating in a wire-array Z-pinch
O2.23	P.Renaudin	Time and space resolved X-ray absorption spectroscopy of aluminum irradiated by a subpicosecond high-power laser
O2.24	J.M.Perlado	Low Activation Materials and Tritium effects in Inertial Fusion Reactors assessment and strategy for adequate irradiation
O2.28	M.Kaluza	Influence of the Laser Prepulse on Proton Acceleration in Thin-Foil Experiments
O2.29	M.Borghesi	Detection of electrostatic fields driving proton acceleration from solid foils irradiated by high-intensity laser pulses
O2.31	S.Kar	Study of ultrashort, high intensity laser matter interaction via proton imaging
O2.33	M.Dreher	Experimental Demonstration of Superradiant Amplification of Ultrashort Laser Pulses in a Plasma

Session O4 (oral)

PaperID	Author	PosterTitle
O4.01	S.Sakakibara	MHD Activities in high- β regime of LHD
O4.02	G.Saibene	Small ELM experiments in H-mode plasmas in JET
O4.03	B.E.Chapman	Demonstration of tearing mode braking and locking due to eddy currents in a toroidal magnetic fusion device

O4.04	M.A.Pedrosa	Direct experimental evidence of coupling between sheared flows development and increased turbulence levels in the TJ-II stellarator
O4.05	M.Wanner	Accuracy of the Magnet Configuration of Wendelstein 7-X
O4.07	I.B.Denysenko	Kinetics of low-pressure discharge plasmas containing dust grains
O4.08	A.A.Samarian	Vortex Structures in Complex Plasmas
O4.09	J.Remy	In situ Infrared Cavity Ring-Down Spectroscopy of a capacitively coupled RF Ar/SiH ₄ dusty plasma
O4.10	V.I.Molotkov	Large-Amplitude and Shock Waves in a dc Glow Discharge Dusty Plasma
O4.11	V.E.Fortov	Transport and Hydrodynamics Phenomena in Non-Ideal Dusty Plasmas
O4.12	O.Arp	Three-dimensional dust clouds in a capacitively coupled rf-discharge
O4.13	R.Keppens	Grid-adaptive simulations of magnetized jet flows
O4.15	R.E.Lee	Numerical simulations of local shock refomation and ion acceleration in supernova remnants
O4.16	B.Hnat	Scaling and a Fokker-Planck model of the fast and slow solar wind as seen by WIND spacecraft.
O4.17	A.A.Schekochihin	MHD Turbulence and Saturation of Small-Scale Dynamo
O4.18	F.Brochard	Characterization of instabilities and study of their transition to turbulence in a magnetized plasma column
O4.19	R.J.Kingham	Quasi-linear model of non-local magnetic field generation in laser-plasmas
O4.20	R.G.Evans	Rapid Heating of Solid Density Material by an Intense Short Pulse Laser
O4.21	RichardR.Freeman	The essentials of generation and transport of high energy electrons in over dense materials the prospect for conventional fast ignition concepts
O4.22	M.Schnürer	Explosion characteristics of small plasma spheres produced with high intensity femtosecond laser-pulses
O4.24	V.P.Krainov	Laser induced fusion in a boron-hydrogen mixture

Session O5 (oral)

PaperID	Author	PosterTitle
O5.04	V.T.Tikhonchuk	Low-level stimulated Brillouin scattering saturation in high-intensity laser-plasma interaction
O5.07	I.Kourakis	Theory of nonlinear excitations in dusty plasma crystals

O5.08	A.B.Kukushkin	Evidences for Skeletal Structures in Tornado and Probable Role of Nanodusty Plasma in Severe Weather Phenomena
-----------------------	---------------	--

Session P1 (Poster)

PaperID	Author	PosterTitle
P1.001	V.V.Yaroshenko	Vertical oscillations of magnetized particles in complex plasmas
P1.002	W.L.Theisen	Breathing-mode resonance of a complex plasma disk
P1.003	A.Melzer	Heating and Phonon Spectra of 2D and 3D Finite Dust Clusters
P1.005	O.S.Vaulina	Analysis of spatial correlation of macroparticles in dusty plasma
P1.007	I.A.Shakhova	Experimental Studying of Dynamical Processes of Phase Transition's
P1.010	T.Trottenberg	Experimental Studies of Dust-Dynamics in Magnetized Complex Plasmas
P1.011	I.Kourakis	Discrete breather modes in complex plasma crystals in the presence of an electric and/or magnetic field
P1.014	A.A.Samaritan	Coulomb Clusters in Dusty Plasmas Dynamics and Stability
P1.015	A.A.Samaritan	Dust as a diagnostic tool to measure potential distribution in plasma
P1.016	M.Wolter	Laser Manipulation of Particles in Dusty Plasmas under Microgravity
P1.017	M.Klindworth	Comparison of 2D Plasma Profiles and Particle Distributions in Complex Plasmas under Microgravity
P1.018	M.Klindworth	Probe induced secondary Voids in Complex Plasmas under Microgravity
P1.020	S.Novak	Modelling of plasma-solid interaction at low and medium pressures
P1.021	A.H.Sari	Concave Cold Cathode Electron Gun Using Obstructed Discharge
P1.022	A.Ustimenko	Simulation of Coal Plasma Ignition and Combustion in a Furnace Chamber
P1.023	V.Messerle	Plasma Application for Coal Combustion Activation
P1.024	T.Antonova	Levitation of particles in O ₂ plasma
P1.025	J.Shebalin	Plasma production and heating in VASIMR - A Plasma Engine for Space Exploration

P1.027	Z.Jankoski	Mathematical Modelling of the Pulverised Coal Preparation for Combustion Using Plasma
P1.029	M.Kraemer	Electron Heating and Plasma Production in Helicon Plasma
P1.030	J.Chutia	Observation of Instabilities in a cylindrical Post magnetron plasma discharge
P1.031	R.S.Rawat	Synthesis of FeCo Nanoparticles by Pulsed Laser Deposition
P1.032	R.S.Rawat	Deposition of Nano-phase FeCo Thin Films using Plasma Focus Device
P1.033	F.Li	Absorption of EM wave by the Mei-Debye scattering of a dust plasma
P1.034	I.B.Denysenko	Control of ion and cation fluxes in low-temperature deposition of ordered carbon nanostructures
P1.035	L.LauroTaroni	Investigation of transients in low-temperature plasmas by means of Partice-In-Cell modelling
P1.036	J.E.Allen	The Plasma Boundary in Electronegative Gases
P1.039	O.S.Vaulina	The numerical study of quasi 2d- dust structures
P1.040	S.A.Maiorov	Kinetics of flowing plasma around rodlike particles
P1.042	O.K.Cheremnykh	Charge Properties of Fine-Dispersed Dust Grains in Space Plasma
P1.048	M.A.Khan	Spectroscopic studies of oxidation of coke in glow discharges in He-O ₂ , Ar-O ₂ , and N ₂ -O ₂ gas mixtures
P1.049	S.V.Petrov	Behaviour of the arc at cathode in combustion products plasma
P1.051	N.Arinaminpathy	On the theory of dust in a plasma using matched asymptotic expansions
P1.053	L.Stenflo	Stimulated scattering instabilities of electromagnetic waves in the Earth's mesosphere
P1.055	T.K.March	Applications of information theory in the near-Earth plasma environment
P1.056	L.Gargaté	Large scale hybrid simulations of interacting plasmas in space
P1.057	M.Watanabe	Effects of an oscillating toroidal electric field in the RFP plasma
P1.059	A.K.Ram	Electrostatic Fields in Density Cavities and Nonlinear Energization of Ions
P1.060	M.E.Dieckmann	Connecting shock velocities to electron injection mechanisms
P1.061	M.E.Dieckmann	Streaming instabilities driven by mildly relativistic proton beams in plasmas
P1.062	M.Lontano	Propagation of a finite amplitude electrostatic disturbance in an inhomogeneous plasma

P1.063	H.Baty	Magnetohydrodynamic instabilities in astrophysical jets
P1.064	A.S.Moore	Tailored Blast Wave Production Pertaining to Supernova Remnants
P1.065	L.O.Silva	On the role of the electromagnetic counter-streaming instability in GRBs
P1.066	R.Sydora	Ultrahigh-Energy Particle Acceleration due to Nonlinear Alfvén Waves in Relativistically Flowing Plasmas
P1.069	A.S.Kholodov	Numerical modeling of behavior of high-energy plasmoid in upper ionosphere and geomagnetic field
P1.070	M.O.Vasiliev	Numerical researches of formation of jet stream of plasma in large-scale geophysical experiment
P1.072	M.V.Goldman	2-D Vlasov Simulations and Theory of Sheared Electron Instabilities in Strongly Magnetized Plasmas
P1.073	O.Ya.Kolesnychenko	Regular and stochastic motion of ions in the presence of Alfvén waves
P1.097	M.Shoucri	VLASOV DESCRIPTION OF SPACE CHARGE INVERSION CLOSE TO THE WALL IN COLLISIONLESS PLASMA SHEATH AT GRAZING INCIDENCE OF THE MAGNETIC FIELD
P1.098	Z.Ahmad	Effect of plasma beam parameters on the plasma-neutrals interaction and generation of hydrocarbons in Magnum-psi
P1.099	V.Veremiyenko	Velocity components in the highly magnetised expanding plasma jet of Pilot-psi
P1.100	H. Maassberg	Self-Consistent Neoclassical Transport Coefficients for Elongated Tokamaks
P1.101	J.J.Martinell	Plasma Spin-up Driven by a MARFE
P1.103	S.I.Krasheninnikov	Evolution of meso-scale plasma pressure perturbations in tokamak
P1.106	R.O.Dendy	Off-axis electron cyclotron heating and the sandpile paradigm for transport in tokamak plasmas
P1.107	J.A.Merrifield	Characterising the Scaling Properties of Incompressible Isotropic Three-Dimensional MHD Turbulence
P1.108	D.E.McGregor	Bernstein mode current drive in spherical tokamaks
P1.109	A.V.Voronin	Development of Intense Plasma Jet Fuelling Source
P1.111	Z.Y.Chen	Determination of the fast electron distribution on HT-7 tokamak
P1.112	L.Q.Hu	Suppression of MHD instabilities in the synergetic IBW plus LHCD HT-7 plasma

P1.113	R.G.L.Vann	Theory and observation of frequency splitting and sweeping in tokamaks
P1.114	P.Helander	The evolution of the plasma current during tokamak disruptions
P1.115	D.Hildebrandt	The Influence of Contamination Layers on Surface Temperature Measurements of Carbon Materials in Fusion Devices
P1.116	G.Sergienko	Measurement of hydrogen retention in plasma facing surface in TEXTOR by laser induced desorption during plasma discharges
P1.117	M.DeBock	Plasma rotation during operation of the dynamic ergodic divertor in TEXTOR
P1.118	M.G.von Hellermann	Overview of Recent Impurity Transport Experiments on TEXTOR
P1.119	H.J.deBlank	Transiently improved confinement after off-axis ECRH in TEXTOR
P1.120	A.Krämer-Flecken	FIRST INDICATIONS OF A TRANSPORT BARRIER INDUCED BY THE DYNAMIC ERGODIC DIVERTOR AT TEXTOR
P1.121	I.G.J.Classen	Fluctuation measurements with the 2-D ECE Imaging system on TEXTOR
P1.122	E.Farshi	EFFECTS of ECRH on Magnetic Islands Created by the TEXTOR Dynamic Ergodic Divertore
P1.123	O.Zimmermann	The influence of the Dynamic Ergodic Divertor on the MHD spectrum in TEXTOR
P1.124	H.R.Koslowski	Investigation of the excitation of error field modes using the Dynamic Ergodic Divertor at TEXTOR
P1.125	Y.Liang	Radiation power profiles in the plasma with the Dynamic Ergodic Divertor on TEXTOR
P1.126	Y.Liang	Observation of mode structure and mode locking using the Dynamic Ergodic Divertor on TEXTOR
P1.127	S.K.Varshney	Investigation of DED generated MHD islands in the TEXTOR plasma with 10 kHz Thomson scattering system
P1.128	S.Ohdachi	Observation of DED-induced Magnetic Islands by a Tangentially Viewing Soft X-ray Camera on the TEXTOR Tokamak
P1.129	G.VanWassenhove	First Results on the Radiative Improved Mode RI Mode with operation of the Dynamic Ergodic Divertor DED at TEXTOR
P1.131	S.Michelsen	Fast Ion Millimeter Wave CTS Diagnostics on TEXTOR and ASDEX Upgrade
P1.132	M.Ponomarjov	Enhanced acceleration of charged particles by crossing RF waves, Resonant Moments Method RMM

P1.133	F.Louche	Three-dimensional Modelling of the ITER ICRF External Matching System
P1.134	W.Biel	Design of VUV impurity monitors and VUV imaging spectrometers for ITER
P1.135	S.Pestchanyi	Radiation losses from ITER SOL due to divertor material plasma
P1.136	J.D.Strachan	EDGE2D Simulations of JET 13C Migration Experiments
P1.138	M.Lehnen	Helium exhaust studies at JET in reversed B
P1.139	J.Bucalossi	Fuel retention over a full day of experiments in JET
P1.140	Y.Corre	Inner and outer power and energy asymmetries during L-mode power staircase pulses with forward and reversed magnetic field
P1.141	V.L.V.Bobkov	Studies of ELM toroidal asymmetry using ICRF antennas at JET and ASDEX Upgrade
P1.142	J.-S.Lönnroth	Modelling of ELM Heat Pulse Propagation with the Integrated Core-Edge Transport Code COCONUT
P1.143	L.Popova	Dependence of ELM frequency on pedestal plasma density and temperature
P1.144	C.Giroud	Z-dependence of Impurity transport in steady-state ITB and Hybrid scenario at JET
P1.145	D.Borba	Confinement Transitions in JET inner wall limiter plasmas
P1.146	H. Weisen	Shear, temperature gradient and collisionality dependences of particle pinches in JET
P1.147	L.Garzotti	Transport and fluid turbulence simulations of JET pellet fuelled ITB plasmas
P1.148	J.Mailloux	Tritium Fuelling of JET Plasmas with Internal Transport Barriers
P1.149	M.Mironov	Tritium Transport Studies with JET ISEP NPA During the Trace Tritium Experimental Campaign
P1.150	M.Mattioli	Core plasma charge states of Mo ions in high electron temperature JET and FTU plasmas
P1.151	M.Valisa	Relationship between core impurity, fuel and thermal diffusivities in L and H mode JET plasmas.
P1.152	N.Kirneva	Role of the q profile in electron ITB evolution in JET discharges
P1.153	P.Mantica	Predictive modelling of electron temperature modulation experiments in JET L- and H-mode plasmas
P1.154	P.Mantica	Power modulation experiments in JET ITB plasmas
P1.155	G.Kamelander	Interpretative Simulation of Pellet Fuelled JET-Plasmas

P1.156	G.Gorini	Neutron emission from beam-injected fast tritons in JET plasmas with reversed or monotonic magnetic shear
P1.157	V.Yavorskij	Confinement of Fast Tritium Beam Ions in Current Hole Plasmas in JET
P1.158	I.Voitsekhovitch	Transport analysis of trace Tritium experiments on JET using TRANSP code and comparison with theory-based transport models
P1.159	A.D.Whiteford	Quantitative forward modelling of neutron emission to derive transport coefficients of tritium in JET, including error propagation through to transport parameters
P1.160	J.Weiland	Effects of temperature ratio on JET transport in hot ion and hot electron regimes
P1.161	M.De Benedetti	Observation of an intermediate rotation regime on JET
P1.162	M.F.F.Nave	Small sawtooth regimes in JET plasmas
P1.163	T.C.Hender	Trace-Tritium Measurement of Magnetic Island Effect on Particle Confinement
P1.164	F.Spineanu	Exact periodic solutions of the Liouville equation and the 'snake' of density in JET
P1.165	P.Buratti	Observation of slow sawtooth reconnection in JET low-shear plasmas
P1.166	T.C.Hender	Modeling of Resistive Wall Mode Experiments in JET
P1.167	M.K.Zedda	Neural approaches to Disruption prediction at JET
P1.168	N.P.Young	MHD spectroscopy determination of q-profile evolution in JET plasma
P1.169	P.Belo	Role of impurity and deuterium fuelling in evolution of trace tritium in JET ELMy H-mode transport analysis and predictive modelling
P1.170	P.Belo	Observation and implication of MHD modes for the hybrid scenario in JET
P1.171	E.R.Solano	Separatrix instabilities and ELMs
P1.173	E.Z.Gusakov	Application of the Upper Hybrid Resonance Backscattering Enhanced Doppler Effect for Plasma Rotation Diagnostic at FT-2 Tokamak
P1.174	E.Z.Gusakov	Influence of Lower Hybrid heating on poloidal plasma rotation and small-scale turbulence in FT-2 tokamak
P1.175	A.B.Kukushkin	Contribution of Suprathermal Electrons to Cyclotron Radiation Transport in Hot Toroidal Plasmas
P1.177	R.R.Khayrutdinov	New RF heating model of the tokamak plasma in the frame of DINA code

P1.179	A.Dnestrovskij	Current Sustainment in Spherical Tokamaks
P1.180	V.N.Dokuka	Simulation of vertical plasma position control system of GLOBUS-M tokamak in the frame of Simulink-DINA concept
P1.181	E.Gusakov	Theory of Poloidal Correlation Reflectometry
P1.182	E.Z.Gusakov	Small-Angle Multi-Scattering Contribution to the Doppler Reflectometry Signal
P1.184	K.Yu.Vukolov	The deposition of contaminants on the in-vessel mirrors in T-10 tokamak
P1.185	R.J.Buttery	3/2 NTM metastability scaling towards ITER
P1.186	D.Shuvaev	Plasma electron densities from singlet and triplet spectral series of the noble gas ions
P1.187	D.A.Shuvaev	LIF-based model experiments on Ar II temperature and density measurements and the time-dependent collisional-radiative model for ITER divertor
P1.189	V.V.Bulanin	Using of Two Frequency Doppler Reflectometer for Study of Internal Transport Barrier in TUMAN-3M Tokamak
P1.190	V.B.Minaev	NBI Heating Experiment on the Globus-M Spherical Tokamak
P1.191	V.G.Kapralov	Radiation losses studies in Globus-M tokamak
P1.192	V.G.Kapralov	Development of pellet technologies for plasma fuelling
P1.194	A.E.Shevelev	Reconstruction of Energy Distribution of Runaway Electrons from HXR Spectra Measured in the Globus-M Spherical Tokamak
P1.195	A.V.Tykhyy	Adiabatic Invariants of Energetic Particle Motion in a Stellarator
P1.197	V.Erckmann	The 10 MW ECRH and CD System for W7-X Status and first tests
P1.198	Yu.A.Turkin	Predictive transport modeling for the W7-X
P1.199	A.Sengupta	Development of Function Parametrization on W7-X Stellarator
P1.200	M.Schmidt	Advanced" delta-f Monte Carlo Simulation of NBI current drive in W7-X
P1.201	V.V.Lutsenko	Effect of the Radial Electric Field on the Confinement of NBI Ions in Wendelstein 7-X
P1.202	C.Nuehrenberg	Island compensation coils in W7-X
P1.203	T.Andreeva	Modelling of magnetic field perturbations and correction possibilities in WENDELSTEIN 7-X
P1.204	N.B.Marushchenko	Analysis of ECCD scenario for the W7-X Stellarator by the high field side ECE measurements
P1.205	B.V.Kuteev	Observation of Dust Production During Carbon Pellet Ablation in W7-AS Stellarator

P1.206	M.Hirsch	Dynamics of poloidal flows and turbulence at the H-mode transition in W7-AS
P1.207	J.Geiger	Equilibrium calculations for the W7-AS stellarator with large internal current densities due to ECCD
P1.208	P.Merkel	Resistive Wall Modes of 3D Equilibria with Multiply-connected Walls
P1.209	H.P.Laqua	Transmission Measurement with high Power ECRH at the Wendelstein7-AS Stellarator
P1.210	M.Schubert	Density, Electron Temperature and Electric Potential Fluctuations and Induced Radial Transport in the Boundary of the Wendelstein 7-AS Stellarator from a Poloidal Array of Langmuir Probes
P1.211	M.Otte	Overview of Recent Results from WEGA Stellarator
P1.212	K.Horvath	Investigation of properties of the WEGA plasmas

Session P2 (poster)

PaperID	Author	PosterTitle
P2.002	S.Curatolo	New Experimental Implications for ICF
P2.004	S.A.Bel'kov	Simulations of X-ray Fields Generated by Laser in LABIRINTH Target on ISKRA-5 Laser Facility
P2.005	S.A.Bel'kov	Influence of Controlled Asymmetry of X-Ray Field on Neutron Yield Generation in Indirect Drive Experiments on Iskra-5 Laser Facility
P2.011	V.Petrzilka	External Magnetostatic Field Effects on Plasma Flows Arising from Primary Electron Acceleration in Two Crossed Laser Beams
P2.016	A.R.Babazadeh	Effect Of Sparkgap Breakdown And Current Buildup Speed
P2.017	V.Fortov	Thermodynamic and Transport Properties of Shock Compressed Plasmas at Megabars
P2.018	V.S.Belyaev	Pinch-effect in Laser Produced Plasma
P2.019	L.B.Samolovskikh	Calculations of spectral opacity for Be-Cu plasmas using STA and Average Atom models
P2.022	X.G.Huang	Hugoniot measurements in copper up to 1.7 TPa using directly laser-driven shocks
P2.024	A.Krenz	Plasma of extreme energy density by intense XUV beams
P2.025	S.I.Tkachenko	Studying of initial stage of wire explosion by x-ray radiography using X pinch as a source
P2.030	E.H.Amara	Modeling of carbon laser produced plasma expansion

P2.031	J.Limpouch	PALS Laser Interactions with Foam Targets
P2.032	E.Y.Echkina	Ion Acceleration during the Coulomb Explosion of the Multispecies Clusters
P2.033	F.Peano	A Self-Consistent Study for the Laser-Induced Coulomb Explosion of Large Deuterium Clusters
P2.035	V.Skvortsov	The radiative magnetohydrodynamics of miniature laser plasma system
P2.037	S.A.Dan'ko	Implosion Dynamics of Multi-material Wire-arrays on S-300 Pulsed Generator.
P2.038	S.N.Srivastava	Energy-transfer and expansion-dynamics of a collisional laser-plasma from planar, atomic and binary targets
P2.039	A.P.Matafonov	Results of experimental investigations on the atomic and nuclear processes going in picosecond laser plasma
P2.042	F.Osman	High Density Particle Beams Driven by Petawatt-Picosecond Clean Laser Pulses for Fusion
P2.043	F.Osman	Application of High Current Density Ions from PW-PS Laser Pulse Nonlinear Force Driven Plasma Blocks for X-ray Lasers
P2.046	F.Osman	Nonlinear Force Laser Driven Plasma Blocks for Fast Ignition
P2.047	F.Osman	An Investigation of the Nature Properties of Plasma
P2.049	M.S.Rafique	Theoretical and Experimental Comparison of Splashing in Different Materials
P2.050	M.Grech	Statistical model for the laser beam multiple scattering on self-induced density fluctuations
P2.054	DavidS.Montgomery	Observation of Fluid and Kinetic Nonlinearities for Langmuir Waves Driven by Stimulated Raman Scattering
P2.056	T.Desai	Study of preheating effects in laser driven shock wave EOS experiments
P2.057	L.Shenye	Laser-plasma interaction in hohlraum plasmas at SGII laser facility
P2.059	B.Shokri	Ion contribution in the instability of high power microwave-produced plasmas
P2.061	A.S.Kholodov	Large-scale plasma experiments, their analysis and numerical modeling
P2.062	G.J.J.Botha	Dynamics of convection around axisymmetric magnetic flux tubes
P2.063	D.Bennaceur-Doumaz	Effects of Magnetic Fields and Nonlocal Electron Transport in Laser Produced Plasmas.

P2.066	E.A.Evangelidis	The Structure of Fields with Electric and Magnetic Components Parallel to Each Other
P2.067	I.Kourakis	Lagrangian formulation of electrostatic plasma waves - Application to dust-acoustic waves
P2.069	F.Porcelli	Driven magnetic reconnection about an X-point in the limit of no guide field
P2.070	A.Wurm	Separatrix Reconnection and Meanders in the Standard Nontwist Map
P2.072	A.B.Kukushkin	Self-Assembling of a Fractal from Nanodust in Electric Discharges from Laboratory to Space
P2.073	E.V.vanderPlas	Kinetic drift effects in magnetic reconnection
P2.075	I.Morozov	Collisions and Langmuir waves in Nonideal Plasmas
P2.076	G.E.Norman	Principles of theory of strongly coupled nonideal plasmas
P2.077	I.Vorgul	Analysis of a cyclotron maser instability with application to space and laboratory plasmas
P2.081	O.Agullo	Self-generate shear flows in helical turbulence
P2.082	E.L.Stupitsky	Investigation of Jet Plasma Stream Formation as a Result of Flutter Mode Growth in Large-Scale and Laboratory Plasma Experiments
P2.098	V.S.Marchenko	Collisional damping of the Alfvén eigenmodes in stellarators
P2.099	T.D.Akhmetov	Experiments on Plasma Pressure Increase in the Solenoid of AMBAL-M
P2.101	D.Terranova	Pellet Injection from the High Field Side on FTU
P2.102	M.De Benedetti	Turbulence behaviour in ion Bernstein wave heated discharges on FTU
P2.104	E.Barbato	Benchmarking of LHCD numerical modelling on FTU discharges and application to ITER-FEAT scenarios
P2.105	E.Barbato	Experimental test of an ITER-like Passive Active Multijunction Lower Hybrid RF launcher on the FTU tokamak
P2.106	J.R.Martin-Solis	Runaway electron behaviour during auxiliary heating in the FTU tokamak

P5.046	D.-K.Kim	Ionization Balance and Electrical Conductivity of Nonideal Metal Plasmas
P5.047	R.Belaouar	Quasilinear electron acceleration in a driven plasma wave
P5.048	M.S.Rafique	Forward Peaking of Laser Induced Plasma Plume
P5.050	R.T.Khaydarov	Particularities of formation of multiply charged ions at the interaction of laser radiation with two-element PbMg targets
P5.051	B.Dubroca	Magnetic Field Generation in Plasmas due to Anisotropic Laser
P5.058	I.Kourakis	Envelope localized modes in electrostatic plasma waves
P5.060	F.Doveil	Hamiltonian dynamics investigated in a traveling wave tube
P5.061	K.G.McClements	Electron inertial effects on Alfvén modes at magnetic X-points

P5.062	N.J.Sircombe	Local electron acceleration by breaking Langmuir waves
P5.063	B.J.Kellett	A laboratory experiment to investigate auroral kilometric radiation emission mechanisms
P5.064	R.Ellis	Stable Supersonic Rotation in the Maryland Centrifugal Experiment.
P5.066	T.Pisarczyk	Studies of crater formation process using double target technique
P5.067	A.Kasperczuk	Investigation of crater creation efficiency by means of single and double targets in the PALS experiment
P5.070	T.W.Johnston	A New Plasma Physics Periodic Kinetic Electrostatic Electron Nonlinear KEEN Excitation and its Relation to SEAS Stimulated Electron Acoustic Scattering
P5.075	Y.Fukuzawa	Formation of Deep Potential Well and its Structural Transition in Small Tokamak Device
P5.077	MarkA.McGrath	Initial TORPEX results of plasma production, confinement and fluctuation studies
P5.078	M.Aflori	Analysis of a complex space charge configuration formed in weakly magnetized diffusion plasma
P5.079	T.SunnPedersen	Confinement of non-neutral plasmas in the CNT stellarator
P5.082	S.Tanriverdi,M.Psimopoulos	Role of trapped particles in linear wave-plasma interactions
P5.083	S.Tanriverdi,M.Psimopoulos	Wavelet representation of plasma particle dynamics in stationary electrostatic waves
P5.084	G.Y.Antar	Kolmogorov-Kraichnan Scaling in the Inverse Energy Cascade of Two-dimensional Plasma Turbulence
P5.085	P.K.Shukla	Ion beam driven electromagnetic fluctuations at Earth's magnetopause
P5.097	S.Kobayashi	3-Dimensional Neutral Particle Transport Analysis in Heliotron J
P5.099	J.H.Harris	Study on energy confinement time of net-current free toroidal plasmas based on extended international stellarator database
P5.101	H.Miyoshi	Intermittent Fluctuation Property of Edge Plasmas in JT-60U and LHD
P5.102	H.Nozato	A study of impurity transport in hydrogen and helium plasmas on LHD

P5.103	S.Morita	Characteristics of H-mode-like discharges in LHD under the presence of 1/1 rational surface at ergodic layer
P5.104	M.Kaneko	Experimental study of high energy particle confinement in Heliotron J
P5.105	K.Ichiguchi	Magnetic Island Generation in Nonlinear Evolution of Interchange Mode
P5.106	M.Aizawa	Effects of Aspect Ratio on Confinement Properties of L 1 Helical Systems
P5.107	T.Yamaguchi	Magnetic Measurements for MHD Equilibrium Reconstruction in LHD
P5.108	R.Kumazawa	Density Increase during Steady-state Plasma Discharge on the Large Helical Device
P5.109	T.Ozaki	Fast Neutral Particle Spectra in Different Pitch Angles in Large Helical Device
P5.110	K.Nagaoka	Hybrid Probe Measurement of Peripheral Plasma on CHS
P5.112	P.R.Goncharov	Local and Multi-Chord Neutral Particle Diagnostics of Complex 3D Shaped LHD Plasma
P5.113	Y.Narushima	Magnetic Diagnostics of Non-Rotating Magnetic Island in LHD
P5.114	T.Tokuzawa	Microwave Reflectometer for Density Profile and Fluctuation Measurements on LHD
P5.115	T.Kobuchi	Shafranov Shift Measurement Using Soft X-ray CCD Camera on Large Helical Device
P5.116	V.Yu.Sergeev	Analysis of first PCX measurements in LHD
P5.117	A.V.Krasilnikov	Study of fast tangentially beam-injected ion behavior in LHD using natural diamond detectors
P5.118	B.Seiwald	Optimization of neoclassical transport in URAGAN-2M
P5.119	R.Schritt Wieser	Measurements of the Fluctuation-Induced Flux and the Reynolds Stress in the edge region of ISTTOK
P5.120	R.Schritt Wieser	Direct plasma potential measurements by a novel probe
P5.122	S.Kuhn	Towards linking fluid and kinetic parameters near the plasma boundary
P5.123	S.Kuhn	Theory of a plane probe in a collisional plasma with fast electrons producing secondary electrons at the probe surface
P5.124	K.Schoepf	Effects of a Current Hole on the Fast Ion Distribution in Tokamaks

P5.125	V.A.Yavorskij	Effect of Magnetic Field Ripples on Fast Ion Non-Adiabaticity
P5.126	R.Kamendje	On electron cyclotron current drive near low order rational magnetic surfaces in tokamaks
P5.127	C.Ionita	A Laser-Heated Emissive Probe for Fusion Applications
P5.128	S.Kuhn	Theory of the Time-dependent Child-Langmuir Sheath
P5.129	W.Li	Preliminary investigation of impurity and radiation behaviors in the HL-2A tokamak
P5.130	L.W.Yan	Numerical Simulation and Experimental Identification of Divertor Configuration in the HL-2A Tokamak
P5.131	B.Wu	Plasma vertical position control simulation of EAST tokamak
P5.137	Y.J.Zheng	HL-2A Plasma Imaging
P5.138	V.Piffel	Intensity radial profiles of VUV lines near the carbon target in the CASTOR tokamak
P5.139	V.Weinzettl	First tests of plasma sprayed tungsten specimens in CASTOR tokamak discharges
P5.141	V.Petrzilka	Modelling of the Effects of Random Fields in Front of LH Grills on Local Fast Particle Production
P5.142	V.Fuchs	Quasineutral simulations of plasma response to the lower hybrid antenna electric field
P5.143	H.Bindslev	Transport and Zonal Flow Energetics in Plasma Edge Turbulence
P5.144	H.Bindslev	Diagnosing fast ions in ITER by collective Thomson scattering
P5.145	K.Thomsen	Analysis of the bias in H-mode confinement scaling expressions related to measurement errors in variables
P5.146	D.Pilipenko	RF Induced Impurity Transport in the Mode Conversion Regime in a H-D plasma at JET
P5.147	S.J.Janhunen	Validation of gyrokinetic particle code ELMFIRE for tokamak edge transport analysis
P5.148	E.A.Evangelidis	Landau resonance between charged particles and plasma waves
P5.149	K.Gál	Modeling of cryogenic hydrogen isotope pellet ablation and cloud expansion
P5.150	G.Kocsis	Investigation of cryogenic pellet cloud dynamics

P5.151	D.Dunai	Combined density-temperature fluctuation measurement with beam emission spectroscopy
P5.154	P.Khorshid	Edge Fluctuations, Disruption and Limiter Biasing in the CT-6B Tokamak
P5.155	A.Hojabri	Magneto-Hydro-Dynamic instabilities in Iran Tokamak 1 IR-T1
P5.156	C.Bruma	Fourier Analysis and Interpretation of Computational Results on Combined Toroidicity, Ellipticity and Triangularity Effects on the Alfvén Modes Excited in Pre-Heated, Low Aspect Ratio Tokamaks
P5.158	S.Cuperman	The Combined Toroidicity, Ellipticity and Triangularity Effects on the Alfvén Modes Excited in Pre-Heated, Low Aspect Ratio Tokamaks, A Systematic Parametric Study
P5.159	C.Giroud	Z-dependence of impurity transport in the Hybrid scenario at JET
P5.160	C.Boswell	Comparison between TAE and EAE properties using MHD spectroscopy
P5.161	J.A.Heikkinen	Gyrokinetic simulation of neoclassical and turbulent transport
P5.162	J.A.Heikkinen	Experiments on ICRF coupling with different phasings
P5.163	M.I.K.Santala	pT fusion by RF-heated protons in JET trace tritium discharges
P5.164	R.Bilato	JET ICRF antennas coupling on extreme plasma shapes
P5.165	P.U.Lamalle	Investigation of low concentration tritium ICRF heating on JET
P5.166	D.Borba	Experiment on tritium beam evolution in JET plasmas with fishbones and TAE-modes
P5.167	A.Salmi	JET Experiments to Assess Finite Larmor Radius Effects on Resonant Ion Energy Distribution during ICRF Heating
P5.168	D.Mazon	Simultaneous real-time control of the current and pressure profiles in JET experiments and modelling
P5.169	F.Sartori	Controlling extremely shaped plasmas in the JET tokamak
P5.170	P.Dumortier	Dual feedback controlled high performance Ar seeded ELMy H-Mode discharges in JET including trace tritium experiments

P5.171	L.Giacomelli	Neutron emission spectroscopy of fuel ion rotation and fusion power components demonstrated in the trace tritium experiments at JET
P5.172	K.Guenther	Complete far-infrared polarimetry measurements at JET
P5.173	S.Popovichev	Performance of Neutron Measurements during Trace Tritium Experiments on JET
P5.174	A.V.Krasilnikov	Neutron Measurements during Trace Tritium Experiments at JET Using a Stilbene Detector
P5.175	M.G.O'Mullane	Detectability of diatomic tritides on the JET tokamak
